2×3		3×2	6
4×2			
5×2			
5×3			

Multiplying by 10 and 9

A. Let's practice multiplying by 10. Here's the quick way to multiply by 10:

When you multiply by 10, just add **0** to the end.

$$3 \times 10 = \underline{30}$$

$$4 \times 10 = \underline{\quad}$$

$$78 \times 10 = \underline{\quad}$$

$$53 \times 10 = \underline{\quad}$$

$$140 \times 10 = \underline{1400}$$

$$295 \times 10 = \underline{\quad}$$

$$500 \times 10 = \underline{\quad}$$

$$628 \times 10 = \underline{\quad}$$

B. Let's practice multiplying a single digit number times 9. Here's the quick way:

First, subtract **1** from the original number to get the tens digit.

Second, subtract this tens digit from **9** to get the ones digit.

First, $4 - 1 = 3$

Second, $9 - 3 = 6$

$$4 \times 9 = \underline{36}$$

$$9 \times 8 = \underline{\quad}$$

$$7 \times 9 = \underline{\quad}$$

$$3 \times 9 = \underline{\quad}$$

$$9 \times 9 = \underline{\quad}$$

$$5 \times 9 = \underline{\quad}$$

$$9 \times 2 = \underline{\quad}$$

$$6 \times 9 = \underline{\quad}$$

Multiplication & Counting Money

A. Let's practice multiplying by 0 and 1.

$8 \times 0 = \underline{\hspace{2cm}}$

$1 \times 6 = \underline{\hspace{2cm}}$

$0 \times 9 = \underline{\hspace{2cm}}$

$7 \times 1 = \underline{\hspace{2cm}}$

$3 \times 0 = \underline{\hspace{2cm}}$

$1 \times 5 = \underline{\hspace{2cm}}$

B. For each multiplication, fill in the blanks.

$2 \times 4 = \quad ** \quad ** \quad ** \quad ** \quad = \quad 4 \times 2 = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}}$

$5 \times 3 = \quad ***** \quad ***** \quad ***** \quad = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}}$

$3 \times 4 = \quad *** \quad *** \quad *** \quad *** \quad = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}}$

$8 \times 2 = \quad ********* \quad ********* \quad = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}}$

C. Draw lines to match the same amounts.

7 nickels + 7 pennies •

• \$0.26

2 dimes + 6 pennies •

• \$0.85

3 quarters + 1 dime •

• \$0.42

4 dimes + 6 nickels •

• \$0.70

Multiplying by 5 & Elapsed Time

A. Let's practice multiplying by 5. Here's the quick way to multiply by 5:

To multiply 5 by an **even** number:
The tens digit is half the number. The ones digit is **0**

To multiply 5 by an **odd** number:
Subtract 1 from the number and halve the answer to get the tens digit.
The ones digit is **5**.

Half of 4 = 2

$$5 \times 4 = \underline{20}$$

$$8 \times 5 = \underline{\quad}$$

$$5 \times 6 = \underline{\quad}$$

7 - 1 = 6, Half of 6 = 3

$$7 \times 5 = \underline{35}$$

$$5 \times 3 = \underline{\quad}$$

$$9 \times 5 = \underline{\quad}$$

B. Complete the table by finding the time.

Start Time	Elapsed Time	End Time
5:35 A.M.	2 hours 45 minutes	
7:20 A.M.		2:25 P.M.
9:40 A.M.	7 hours 25 minutes

Division: Cake Baking

A. Cut out the pieces from the top half of the next page. Make pockets as instructed. Glue your pockets in the space below. Store the pieces in the numbers pocket. Place the pieces in the equation pocket to “write” the equation and answer to the problem below.

Your mother uses two eggs when making a cake.
Today she made two cakes. How many eggs did she use today?

Glue your number and equation pockets here.

B. Cut out the pieces from the bottom half of the next page. Make pockets and glue them below. Store the pieces in the numbers pocket. Place the pieces in the equation pocket to “write” the equation and answer to the problem below.

If your mother used 4 eggs when she made 2 cakes,
How many eggs does she use to make one cake?

Glue your number and equation pockets here.

Cut out along the solid lines and fold along the dotted lines. Fold the back section up and then glue down the flaps to form a pocket. Use these 2 pockets and 11 pieces for **Part A** on **Day 111**.

1	2	3	4	1	2	3	4	x	÷	=
---	---	---	---	---	---	---	---	---	---	---

Cut out along the solid lines and fold along the dotted lines. Fold the back section up and then glue down the flaps to form a pocket. Use these 2 pockets and 11 pieces for **Part B** on **Day 111**.

Division: Cake Eating

Cut out the cake pieces at the bottom of the page. Place a cake piece under each kid, one at a time, until all the pieces are placed. This will solve the division problem below. Once you solve the problem, glue the cake pieces to the page.

If your mom's cake was cut into 12 pieces and 4 kids were going to eat them, how many pieces of cake could each kid eat?

That's the answer to this: $12 \div 4 = \underline{\hspace{2cm}}$

CUT ALONG DOTTED LINES

Multiplying by 2 & Dividing by 2

A. Multiplying by 2 is doubling the number. Let's practice multiplying by 2.

6	2	3	2	0	8	2	2
$\times 2$	$\times 9$	$\times 2$	$\times 5$	$\times 2$	$\times 2$	$\times 4$	$\times 7$
<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>	<div style="border: 1px solid black; width: 50px; height: 50px;"></div>

B. Dividing by 2 is cutting in half. It's doing the opposite of doubling or multiplying by 2. Let's practice dividing by 2.

$2 \times 2 = 4$

If I gave you 2 balls, 2 times, you would have 4 balls.

$4 \div 2 =$

Divide 4 balls into 2 groups. How many are in each group?

$3 \times 2 = 6$

$6 \div 2 =$

Draw circles to make 2 groups of balls.

$8 \div 2 = \underline{\hspace{2cm}}$

$12 \div 2 = \underline{\hspace{2cm}}$

$16 \div 2 = \underline{\hspace{2cm}}$

$10 \div 2 = \underline{\hspace{2cm}}$

$14 \div 2 = \underline{\hspace{2cm}}$

$18 \div 2 = \underline{\hspace{2cm}}$

Dividing with 0 and 1 & Perimeter

A. For each problem, fill in the blank and write a division sentence.

If you divide **4** candies into **1** group,
that group will have _____ candies.

$$\square \div \square = \square$$

If you divide **0** candies into **5** groups,
each group will have _____ candies.

$$\square \div \square = \square$$

B. Let's practice dividing with 0 and 1. Like subtraction, you can't switch the numbers in division. It only works one direction.

$$0 \div 8 = \underline{\hspace{2cm}}$$

$$0 \div 3 = \underline{\hspace{2cm}}$$

$$5 \div 1 = \underline{\hspace{2cm}}$$

$$8 \div 1 = \underline{\hspace{2cm}}$$

$$7 \div 1 = \underline{\hspace{2cm}}$$

$$6 \div 1 = \underline{\hspace{2cm}}$$

$$0 \div 7 = \underline{\hspace{2cm}}$$

$$4 \div 1 = \underline{\hspace{2cm}}$$

C. Calculate the perimeter of each rectangle.
