

Adding 2-Digits & Estimating Sums

A. Solve the addition problems to find the actual sums.

78	23	47	68	84	48
$+ 93$	$+ 16$	$+ 26$	$+ 76$	$+ 42$	$+ 16$
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

B. Estimate the sums to the nearest ten. Round the numbers to the nearest ten and then add them. The first one is done for you!

$$\begin{array}{r} 78 \rightarrow 80 \\ + 93 \rightarrow + 90 \\ \hline \text{estimate: } 170 \end{array}$$

$$\begin{array}{r} 23 \rightarrow \\ + 16 \rightarrow + \\ \hline \text{estimate: } \end{array}$$

$$\begin{array}{r} 47 \rightarrow \\ + 26 \rightarrow + \\ \hline \text{estimate: } \end{array}$$

$$\begin{array}{r} 68 \rightarrow \\ + 76 \rightarrow + \\ \hline \text{estimate: } \end{array}$$

$$\begin{array}{r} 84 \rightarrow \\ + 42 \rightarrow + \\ \hline \text{estimate: } \end{array}$$

$$\begin{array}{r} 48 \rightarrow \\ + 16 \rightarrow + \\ \hline \text{estimate: } \end{array}$$

C. Compare the actual sums and the estimated sums. Are they good estimates?
