

## What Did You Learn?

Fill in the blank with the word that best fits.

cell wall    chlorophyll    chloroplast    Golgi body  
lysosome    photosynthesis    vacuole

removes the cell of waste \_\_\_\_\_

organelle only found in plant cells \_\_\_\_\_

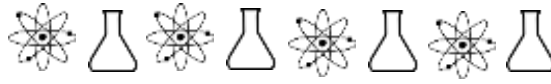

wraps proteins into a bundle \_\_\_\_\_

using sunlight, nutrients, and water  
to make food \_\_\_\_\_

chemical that soaks up sunlight  
to use for energy \_\_\_\_\_

stores extra water and nutrients \_\_\_\_\_

a stiff structure that surrounds the  
cell and protects it \_\_\_\_\_
