

Organelle Review

Gather objects to represent each of the organelles on the list.

Organelle	Function	Object selected
cell wall	protects plant/ bacteria cells	
chlorophyll	collects sunlight in plants	
ER	highway; sends messages	
flagella	helps bacteria cell move	
Golgi body	packages proteins	
lysosome	gets rid of waste	
mitochondria	makes energy for the cell	
nucleus	houses the DNA	
ribosome	decode; make proteins	
vacuole	stores water and nutrients
