What is a Shark?

Cut out the rectangle as one piece and fold on the dotted line. Inside (opposite the “glue here” side), write or paste the information about sharks.

A shark is the fastest fish in the ocean. The temperature of the water determines a shark’s body temperature because they are cold-blooded. Like other fish, they breathe with gills. There are more than 250 species of sharks!
Cut out the beach cards. Write the word from the box that best fits the definition. Stack the cards into a book with the title page on top and add to your lapbook.

Shark Vocabulary

This forms a shark’s skeleton.

A group of fish.

These allow a shark to breathe.
