## Tree Observation

Sit quietly near your tree. Take notes on your observations.

<table>
<thead>
<tr>
<th>Looking</th>
<th>Listening</th>
<th>Touching</th>
<th>Smelling</th>
<th>Any other observations?</th>
</tr>
</thead>
<tbody>
<tr>
<td>What living things do you see in and near your tree?</td>
<td>Do you hear animals playing or singing in the tree? Do you hear wind moving leaves or branches?</td>
<td>Is the bark smooth or rough? Are the leaves soft or prickly?</td>
<td>What does the bark smell like? The leaves? Are there flowers on the tree?</td>
<td>Has the tree changed since the previous season?</td>
</tr>
</tbody>
</table>

Draw the tree. Use a tape measure to record the measurement around the tree.

Make a rubbing of the bark.

Make a rubbing or trace a leaf.

What season is it now?

What kind of tree are you observing?
