

Counting to Subtract – Lesson 121

Practice counting on. When we're trying to figure out addition problems we count on. Go around the board adding on 1, then 2, then 3. Color in each spot you land on. Start is 0. The first thing you'll do is add 1. So, you will color in 1. Then you will add 2. So, you will count 1-2 and land on 3 and color in the number 3 space. You can keep track of what you are adding by crossing off the numbers at the bottom of the page.

1 2 3 4 5 6 7 8 9 10

How many more do you need to add on to make it to 63?
