

American Revolution Lapbook

Cut out map along dark black line. Cut out the rectangle with the questions as one piece. Fold on dotted line so that the questions are on the outside. Cut along solid line between questions. Lift the flaps and answer the questions by using the key along the bottom of the map showing the scale. Attach to lapbook right under map. To find the scale: Measure the distance between the 0 and the 5. Every time you measure that distance on the map it equals 5 miles. That is called the map's scale.

About how far is it from Charlestown to Concord?	About how far is it from Concord to Lexington?

American Revolution Lapbook

Cut out as one piece. Fold down the middle so the questions are on the front. Cut along lines between questions. Open flaps and write your answers inside. In your lapbook, attach this piece along the right-hand side of the map of Boston.

	Where were the British warships waiting?
	Where was the first shot fired?
	Where did the Minute Men start to fight back?

American Revolution Lapbook

Cut out as one piece. Fold like a matchbook. Inside write these words and add their meanings: fort, military stores, seize. Use the dictionary and context clues to find the definitions. Then write:

Who: Rebellious _____

Where: King's fort at _____

**FORT MILITARY
STORES SEIZED!**
